Enjoy fully customisable reporting capabilities to schedule and customise your audit management process.

Schedule and track audits

Schedule and plan audits in advance to meet compliance requirements. Assign responsibility for actions with set expiry dates.

Customise reporting

Automatically receive summary reports, track audit status through a dashboard, filter data, and export to Excel for in-depth analysis.

“Scheduling of audits and planning for sites is simplified by emailing the responsible persons directly and no longer relying on out-of-date paper versions. As the group manager across nine sites, I can access the data and review the hazards identified immediately and I can approve the corrective actions. The online data allows the group to access other sites’ risk and hazard identifications and have a uniformed reduction of similar processes in line with the WH&S Acts.”

Group Head Safety & Compliance,
