

Boost workplace safety with AI monitoring

Rapid Monitor leverages AI-powered computer vision technology, to help workplaces enhance safety, strengthen security and improve operational efficiency.

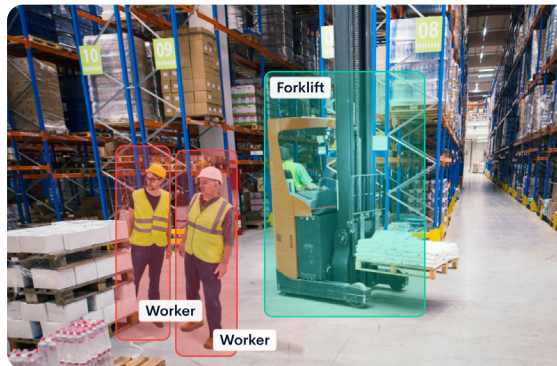

Enhance safety with **AI-powered object detection**

Integrate Rapid Monitor with existing workplace cameras to gain better awareness of unsafe acts and hazards. Detect a range of issues to proactively improve safety processes and operations.

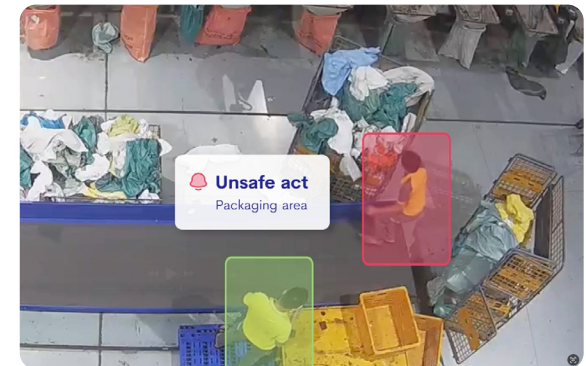

Track PPE compliance

Track instances of missing PPE, such as hard hats and hi-vis vests. See trends over time for different areas of the workplace.

Monitor forklift proximity

Identify close encounters between forklifts and pedestrians with proximity alerts. Be alerted in real time and easily see if such incidents are on the rise or decline.

Monitor zone breaches

Track unauthorised activity within specific zones such as someone standing on a conveyor belt, or a pedestrian moving outside designated walkways.

Unlock more workplace insights

Gain real time visibility into unsafe actions that can be leading indicators for more serious incidents. Record and review trends to proactively enhance workplace safety.

Identify previously unseen issues

Rapid Monitor can identify a wide range of issues such as someone lying on the ground hurt, someone on the roof dangerously close to the edge or someone climbing a fence.

Improve gaps in safety

Use the insights to focus on the implementation of corrective actions that address the most significant issues.

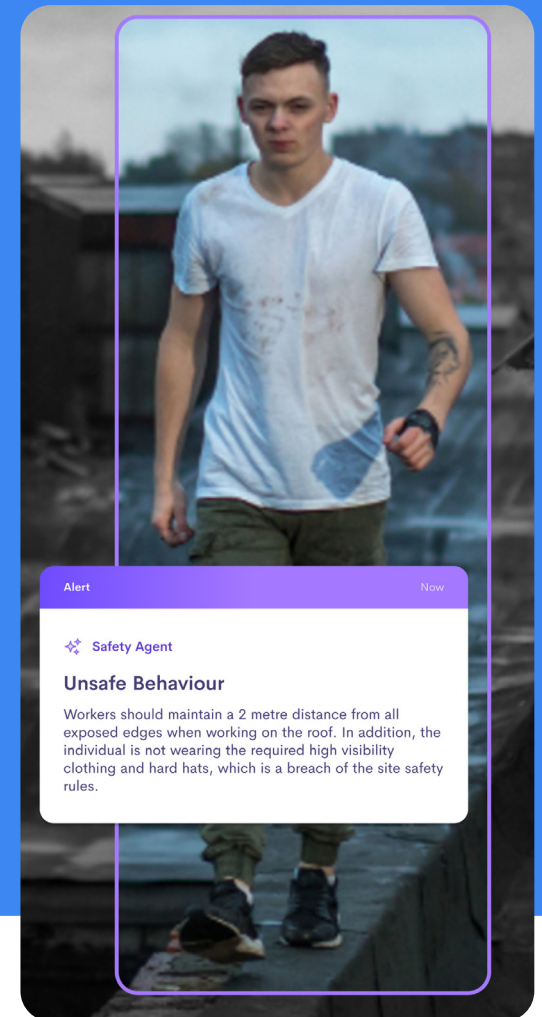

Enforce your safety rules

Optionally provide extra information to help Rapid Monitor identify the events you care about. This includes your preferred alarm schedule.

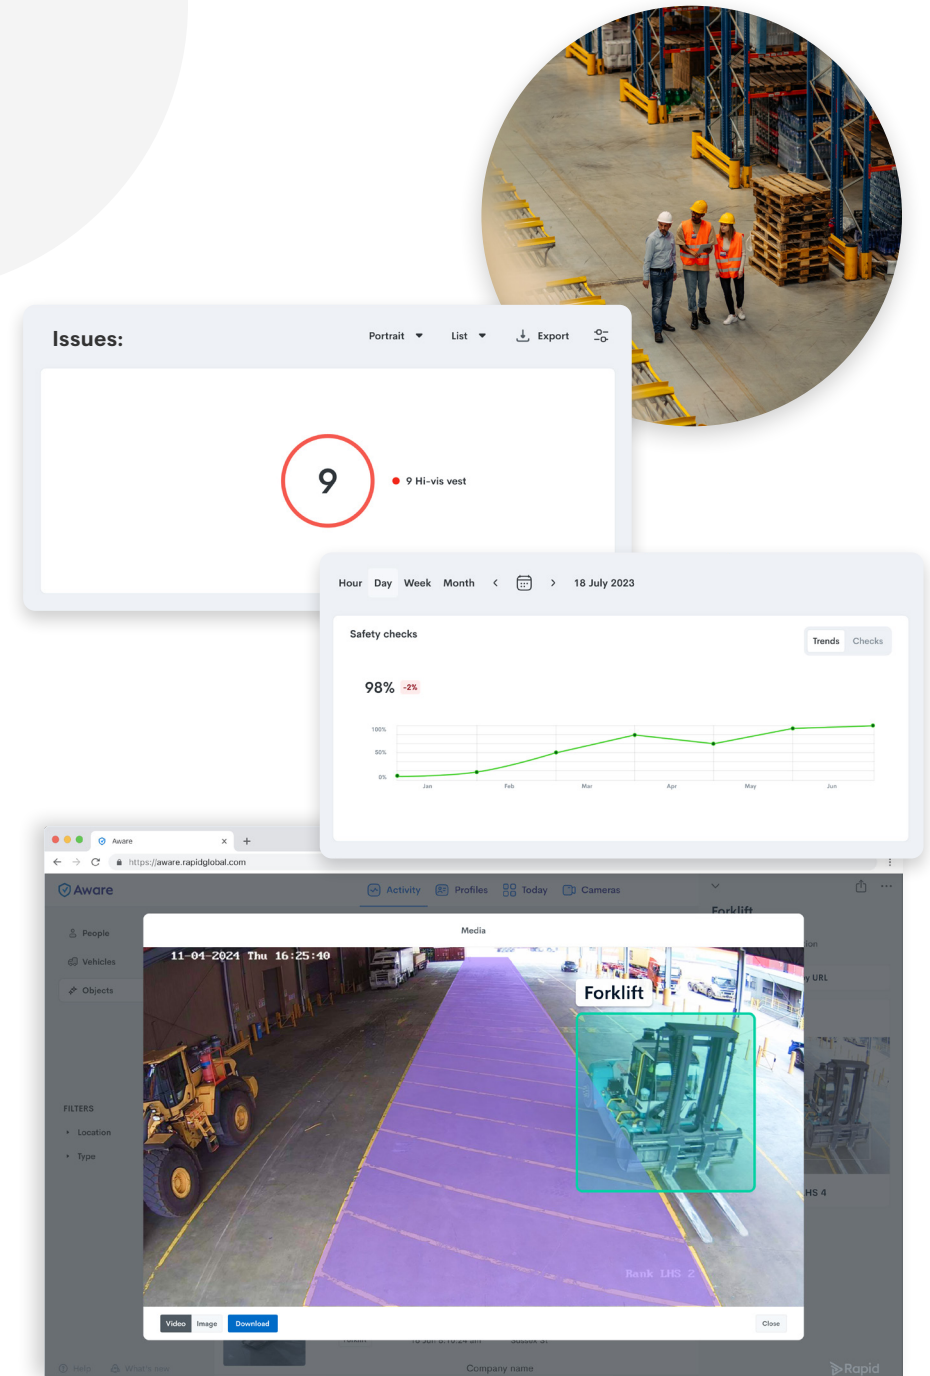

**In Australia,
31% of incidents
fail to be reported.**
